
embodied interaction
actions, observations
perception intake
ingestion, segmentation
action–observation fragments
attribution window 8–120 s
evidence accumulation
support / contra / confidence
relational write-back
promotion to graph + mark-active
scaffolding: recipe/block tables
unified cognitive graph $G=(V,E,W)$
structure + activation values persist
spreading activation
decay, gain, suppression, Top-k
consumers: reward ledger, trial ledger,
event framework (production default off)
task-relevant cognitive state
working set of relevant knowledge
behavior / action selection
consumers: ledger, events, affect
